- Specific for problem molds only
- No waiting weeks for lab results
- Validated by AIHA-accredited laboratory
- Most sensitive rapid test available

A Must For Renters

I was moving into a new apartment and suspected there was a mold issue in the kitchen under the sink. A few days after signing the lease I bought this test and sure enough - there were problems. I took the mold test results to the owner and had them take care of the problem.

- D.G.

Moldy

I bought this because I had a feeling that I had mold in my bathroom...turns out according to this test that I did. So the next step is to talk to the landlord to get it fixed... Easy to use, easy to understand.

- Sammy N.M.

Very Easy Test

This is a really easy to do test. I used this to test mold-like patches in my bathroom wall. Test includes a few very simple steps to follow...Overall, it's a good product.

- Marcus C.

Good Quick Indicator...

...This kit showed my landlord there was mold and we're in the process of getting it remediated... was far cheaper than spending \$300 for a professional to come in and look for. This is worth the money for sure.

- ScreamingMiMi

IAQ Helped Prove My Case

...The IAQ Pro gave me the results I needed to take action against the management company. I was reimbursed for all of my costs, had the closet repaired from further leaks, had the mold removed and had it freshly painted. ...Very, very pleased with my outcome and highly recommend this test for anyone in the same position.

- Delia L.

FAQ's

Frequently Asked Questions

What are the advantages of the IAQ Pro® 5-Minute Home Mold Test?

Other mold test kits are really nothing more than collection kits to send to a lab. Unless you send it into a lab for an additional fee those other kits cannot distinguish between problem molds and everyday types of mold. Figuring in additional fees for lab testing, other kits will cost the average user \$80 to \$100 for each location tested and they can take up to two weeks to obtain lab results. The IAQ Pro does not require any additional fees to determine the presence of unhealthy molds and it's easy to do yourself in minutes.

Where should I test in my house?

If you are concerned about general air quality in a specific room, it is best to sample dust in that room. Typically this settled dust would be taken from a bookshelf or other flat surface in the room of concern. Alternatively, if your primary worry is an area showing possible mold growth, you should sample the area directly (a wet wall or ceiling for example). If you are concerned about both your air quality and specific suspect "moldy" areas you might consider purchasing multiple kits.

Does the IAQ Pro® 5-Minute Home Mold Test detect all types of mold?

The Alexeter IAQ-Pro® Home Mold Test has been shown to detect only the types most associated with water-damage and health issues such as Aspergillus, Chaetomium, Penicillium and Stachybotrys species. It does not give positive results for molds naturally found in the environment in the absence of water leaks such as Alternaria and Cladosporia species.

Product Features

- No need for costly inspectors
- Like no other DIY test on the market!
- Detects over 32 unhealthy mold species... including Stachybotrys chartarum
- Easy-to-use...three quick steps: sample area, snap bulb to wet and add directly to test
- Patented technology licensed from the U.S. PHS; no waiting for lab results
- Includes toll-free technical support and professional referral service

Joy M. ★★★★★

This company's product and customer service is outstanding. For us it was a much better fit than using other methods which would've required a delay in the results. This test result required about 15 minutes for us.

Product Description

This is the best value in home mold testing! Before buying those "low-cost" mold kits, get the facts. Do your own testing quickly and easily while saving money as compared to those other mold kits. Why wait 48 hours for a culture dish and another 7 days and \$30 more to find out you have a mold problem? The IAQ Pro 5-Minute Mold Test gives results in minutes and detects the most worrisome molds associated with water damage and illness.

Lannie R. ★★★★★

This item worked was easy to use and gave results within minutes. I would recommend it to anyone who has any doubts about mold in their home.

Unlike other products that offer collection kits for mail-in testing, the IAQ Pro 5-Minute Home Mold Test works for more than 32 different types of molds that cause illness.

Enzo's Mom ★★★★★

...So much better than spending hundreds of dollars on a guy who may or may not know more than you!

Worried about your air quality? Test the settled dust in the room of concern. Not sure what you have? Just sample suspect areas for possible mold contamination. These tests have been validated in an EPA-licensed and AIHA-accredited environmental lab as the most sensitive and accurate rapid tests available. IAQ Pro mold tests are up to 100 times more sensitive than other rapid tests on the market.

Provided in the kit are all the materials necessary for testing as well as easy-to-follow instructions. Still want a certified-laboratory report? A postage-paid mailer and sterile swabs for optional lab confirmation are included in the kit. An instructional video is available online at IAQProNow.com. This product is made entirely in the USA.

Dwnundrguy ★★★★★

Very easy to use and quick results.
